

## Commodities for Sale

Excess strategic and critical materials offered for sale in a given fiscal year (Oct.1-Sept.30) will vary based on policy requirements, Congressional authorizations and market conditions. The following list of materials provides basic information on those excess strategic and critical materials that were originally offered for sale in FY 1998 and remain available for FY 2004 based on previous public laws. Fiscal Year 2003 sales figures for the various commodities have been published in the latest Strategic and Critical Materials Report to the Congress. See ["What's New"](#) for any updates on meetings, speeches, pending legislation or press announcements. See listings below for sales offerings and recent updates.

A section containing the ["Sales Solicitations"](#) is available, beginning with Aluminum Oxide(s). Specific commodity solicitations will be added on a program priority basis. Solicitations will be periodically updated or amended based on prior sales results. In addition to the general linkage, using the "Yes" response in the individual commodity listing will provide access to the solicitations.

<a href="#">Aluminum Oxide(s)</a>	<a href="#">Lead</a>
<i>Antimony</i> <del>sold out</del>	<i>Manganese Metal</i> <del>sold out</del>
<i>Bauxite(s)</i> <del>sold out</del>	<a href="#">Manganese Ores</a>
